Agricultural Statistics of India

1938-39

VOLUME II—INDIAN STATES

Introductory Note

THIS volume deals with statistics for Indian States as far as reported. As in the previous issues, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States, and the totals for all the reporting States. The total number of cattle, as far as reported, in each of the years 1919-20 to 1938-39 has also been included in the general summary table (No. 1). These statistics are defective for comparative purposes, as additions have been made in the number of reporting States from time to time. Two charts and an index for easy reference have, as usual, been added to the volume. General.

It should be noted that, for the reasons explained in subsequent paragraphs, the agricultural statistics of Indian States are incomplete. They are also of far less accuracy than those of British Provinces published in Volume I. As these States comprise one-third of the total area of India, the importance of the statistics relating to them can scarcely be over-estimated.

The total area of Indian States is 459 million acres (717,000 square miles), with a population of 81 millions according to the Census of 1931. These States are divided, for purposes of agricultural statistics, into two main classes, namely, (1) States within the jurisdiction of Provincial Governments and Administrations, and (2) States having direct political relations with the Crown Representative.

(1) *States within the jurisdiction of Provincial Governments and Administrations.*—These States comprise only Manipur and the Khasi and Jaintia Hill States in Assam, and their total area is 7,891,000 acres, with a population of 626 thousands.

No agricultural statistics are at present prepared for these States. The total area of these States is included in the area of Assam stated in column 2 of Table I of Volume I (British India), but is also shown separately in column 3 of that table in order to arrive at the net area of British territory (in column 5) dealt with in that volume.

(2) *States having direct political relations with the Crown Representative.*—These are divided into the following main groups :—

| | Area Thousand acres | Population Thousands |
|--|------------------------|-------------------------|
| Baluchistan States | 51,462 | 405 |
| Baroda | 5,050 | 2,443 |
| Bombay States (including Western India States) . | 36,248 | 7,976 |
| Central India States | 33,121 | 6,648 |
| Eastern States | 42,921 | 8,093 |
| Gwalior | 16,511 | 3,523 |
| Hyderabad | 52,027 | 11,436 |
| Kashmir | 52,061 | 3,623 |
| Madras States | 6,842 | 6,755 |

NOTE.—The grouping of the Indian States has been arranged according to their geographical situation, irrespective of the changes made in the allocation of these States under different political agencies.

| | Area Thousand acres | Population Thousands |

| Total | 150,648 | 80,542 |

No agricultural statistics are at present available for the Baluchistan States. Eastern States*, North-West Frontier Province States, and Sikkim. Of the remainder, returns are received from the following eighty States :—

¶ The difference between this figure and the total area as shown in column 2, Table I, on page 14 is due to the inclusion here of complete area figures for Barwani and Simla Hill States taken from the census returns.

I, area

From the total area of all the eighty reporting States (257,849,000 acres*), deduction must be made of 106,842,000 acres, comprising chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures, for which statistics are not available. The net area actually covered by these statistics is, therefore, only 151,007,000 acres by professional survey†, or 151,161,000 acres according to village papers‡.

II, classification of area

This area is classified, for purposes of agricultural statistics, under the heads

| | Thousand acres | Per cent |
|---|-------------------|-------------|
| Forests | 10,244 | 12.7 |
| Not available for cultivation | 31,139 | 20.6 |
| Other uncultivated land excluding current fallows§ | 20,191 | 13.4 |
| Current fallows | 12,995 | 8.6 |
| Net area sown | 67,493 | 44.7 |
| Total | 151,062 | 100 |

shown in the margin as far as details are available †. Forests occupy 10,244,000 acres, or 12.7 per cent of the total area, and the area not available for cultivation, that is, land absolutely barren, or unculturable, or covered by buildings, water, and roads, or otherwise appropriated to uses

other than agriculture, amounts to 31,139,000 acres, or 20.6 per cent; while other uncultivated land excluding current fallows amounts to 20,191,000 acres, or 13.4 per cent of the total area, and land kept fallow in the year under report 12,995,000 acres, or 8.6 per cent. The net area actually sown in the year was thus 67,493,000 acres (44.7 per cent of the total area). This net area sown, however, excludes areas sown more than once in the year. If areas sown more than once (as noted below) are taken as separate area for each crop, the gross area sown in the year of report amounts to 70,785,000 acres.

III, under irrigation

The total area irrigated in the reporting States during 1938-39 was 10,676,000 acres, as against 10,765,000 acres in the preceding year. Of this, 4,086,000 acres were irrigated from Government canals, 981,000 acres from private canals, 1,807,000 acres from tanks, 2,874,000 acres from wells, and 928,000 acres from other sources of irrigation. These figures, however, do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas sown more than once are counted as separate area for each crop, the gross area of irrigated crops amounts to 11,769,000 acres, of which 9,069,000 acres are reported to have been under food crops.

* The difference between this figure and the total area as shown in column 2, Table I, on page 14 is due to the inclusion here of complete area figures for Barwani and Simla Hill States.

† For explanation of the terms "professional survey" and "village papers", see footnotes to Table I (page 8) of this volume and the Note prefixed to Volume I.

‡ *Vide* footnote (h) on page 35.

§ Replaces the former head "culturable waste other than fallow". Out of the total area shown under this head 1,400,000 acres are definitely known to be culturable (*vide* column 11 of Summary Table No. 2 on page 4).

The gross area cultivated with crops in the reporting States was, as already stated, 71 million acres in 1938-39. The different classes of crops and the area occupied by each, so far as details are available*, are stated in the margin. Of the total area sown, food crops occupied 52,373,000 acres, or 74·2 per cent and non-food crops 18,176,000 acres, or 25·8 per cent. Of the food crops, food-grains (cereals and pulses) occupied as much as 49,315,000 acres, or 69·9 per cent of the total area sown, and other food crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food crops together) covered some 3,058,000 acres, or 4·3 per cent of the total. Of the non-food

crops, oilseeds occupied 7,644,000 acres, or 10·8 per cent of the total area sown, fibres such as cotton, hemp, etc., 7,147,000 acres, or 10·1 per cent, and fodder crops 2,228,000 acres, or 3·2 per cent. The other non-food crops, namely, dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.) and miscellaneous non-food crops together covered about 1,157,000 acres, or 1·7 per cent of the total.

The total extent of land on which more than one crop was raised during the year was 3,292,000 acres.

Table V is returned by one hundred and one States, namely, Ajaigarh, Ali-Rajpur, Alwar, Aundh, Bahawalpur, Banganapalle, Banswara, Baoni, Baroda, Barwani, Benares, Bharatpur, Bhavnagar, Bhopal, Bijawar, Bikaner, Bilaspur, Bundi, Chamba, Charkhari, Chhatarpur, Cochin, Cutch, Datia, Dewas (Junior), Dewas (Senior), Dhar, Dharampur, Dholpur, Dhrangadhra, Dhrol, Dungarpur, Faridkot, Gondal, Gwalior, Hyderabad, Idar, Indore, Jafarabad, Jaipur, Jaisalmer, Jaora, Jath, Jhabua, Jhalawar, Jind, Jobat, Junagadh, Kapurthala, Karauli, Kashmir, Khairpur, Kishangarh, Kotah, Kushalgarh, Limbdi, Loharu, Maihar, Malekotia, Mandi, Marwar, Miraj (Senior), Morvi, Mudhol, Mysore, Nabha, Nagod, Narsingarh, Navanagar, Orchha, Palampur, Palitana, Panna, Partalgarh, Patiala, Phaltan, Piploda, Porbandar, Pudukkottai, Radhanpur, Rajgarh, Rajkot, Ramdurg, Rampur, Ratlam, Rewa, Sachin, Sailana, Samthar, Sandur, Shahpura, Sirmoor, Sirahi, Sitaman, Tehri-Garhwal, Tonk, Travancore, Vijayanagar, Wadhwan, Wankaner and other Western India States. According to the latest statistics—(collected in most cases in connexion with the Fourth All-India Cattle Census held in 1935)—the total number of live-stock of the bovine class (bulls, bullocks, cows, buffaloes and young stock, i.e., calves and buffalo calves) was 52,447,000, of the ovine class (sheep and goats), 32,907,000 and of horses and ponies, mules, donkeys and camels, 1,745,000. The numbers of ploughs and carts were 6,320,000 and 2,010,000 respectively.

Table VI (Land Revenue) is prepared by thirty-seven States, namely, Alwar, Aundh, Banganapalle, Barwani, Benares, Bharatpur, Bhopal, Bikaner, Bilaspur, Bundi, Cochin, Dharampur, Dholpur, Gwalior, Hyderabad, Indore, Jaipur, Jath, Jhalawar, Kashmir, Kotah, Marwar, Miraj (Senior), Mudhol, Mysore, Nagod, Narsingarh, Orchha, Phaltan, Pudukkottai, Rajgarh, Ramdurg, Rampur, Sachin, Sandur, Tehri-Garhwal and Tonk.

The Appendix explains the vernacular terms used in this volume, and the charts illustrate (1) the classification of the total area showing the proportion of cultivated and uncultivated lands, and (2) the total area sown in 1938-39 divided between food and non-food crops.

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in Southern India. In States where there has been no professional survey, the figures are based on the best available information.

Column 3.—In this column is deducted the entire area for which the statistics required for Tables II and IV are not forthcoming in whole or in part. This area comprises chiefly estates held on privileged tenures, which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (4 and 5) and dealt with in Tables II and IV is correspondingly increased.

Columns 4 and 5.—Column 4 is a check on the accuracy of column 5. In the latter, "village papers" mean "the papers prepared by the village accountants". In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily repeated in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in block, the area by village papers represents the added total of field and village areas, and (b) because, the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads is not always uniform in the two sets of returns.

* Statistics are furnished by twenty-seven States of this group, namely, Bashaer, Jubbal, Theog, Tharoch, Kumharsain, Khaneti, Baghal, Ghund, Manlog, Baghat, Madhan, Koti, Keonthal, Bija, Dhami, Darkoti, Knthar, Nalagarh, Bhajji, Kunihar, Rawalgarh, Balsan, Delath, Dhadi, Mangal, Ratesh and Sangri. These represent over 96 per cent of the aggregate area of all the States comprised in the group. The returns, however, relate generally to the settled portions of the reporting States.

† Column 2.—As there has been no revenue survey so far, this column states the area of the State according to the best available information. Column 3 states the areas of jagir and musfi villages, the boundaries of which have been demarcated, but for which the statistics required for other tables are not available. Columns 4 and 5.—In the absence of any revenue survey data, the figures in column 5 are generally repeated in column 4.

‡ Increase due to inclusion of additional States comprised in the group. § See footnotes on page 22.

Column 3 states the areas of jagir and such other villages as are still unsurveyed. It also includes the area of those khalsa villages which have not yet been regularly assessed; these are chiefly the latest acquisition to khalsa under the law of escheat.

Columns 4 and 5.—The area by village papers does not differ from the area by survey, for, although differences occur under the different classes of soil, the total area of each village is the same in both cases.

Column 2.—The definition of the term "Forests" is as follows:—"Any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area sown), an explanation being given in a note.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the area sown. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

*Figures given in this column represent areas definitely known to be culturable.

†Replaces the former head "Culturable waste other than fallow".

(a) Included under "Other uncultivated land excluding current fallows".

* Figures given in this column represent areas definitely known to be culturable.

† Replaces the former head "Culturable waste other than fallow".

‡ Column 2 states the areas of forests left unassessed. Forests in this State not having been demarcated, figures in columns 3 and 4 also include some forest areas. Column 4 states culturable land not in possession of any cultivator. Column 5 states uncultivated land, i.e., *Bir* (grass lands) and pasture land in possession of cultivators for which they pay land revenue. It also includes the area thrown out of cultivation for three or more years.

Column 2 states the areas of State and district forests and of plantations.

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture, but the exact area of all such lands cannot be ascertained, although it cannot be large.

*Figures given in this column represent areas definitely known to be culturable.

NOTE.—The variations in the areas shown in different years under the same crop in the same tract do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

Columns 2 to 7 state the area actually irrigated during the year, areas sown more than once being counted once only.

Columns 8 to 19 state the gross area of irrigated crops, areas sown more than once being counted as separate areas for each crop. This accounts for the excess in some cases of the total area of crops irrigated (column 19) over the total area irrigated (column 7).

(a) Includes 1,883 acres for which details are not available.

NOTE.—(i) In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings have been devoted to other crops: in such cases the area first sowings omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by higher authorities.

(ii) The variations in the areas shown in different years under the same crop in the same tract do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

(a) Included under "Cumbu or bajra."

Column 3(a)—Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 11). Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Column 4—This column should be sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste.

Column 5—Where land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those by the rayats to the zamindars. The actual realisable demand on account of the year should be entered, after excluding arrears for past years. This column should include all the heads classed as "Land Revenue" in the Civil Accounts.

Column 6—The population in column 6 is mostly that of the last general census held in 1931.

* Represents the net area by professional survey (column 4 of Table I, No. 5, page 8).

* *Alwar*—The classes of tenure are zamindari and village communities, the former comprising *zamindari-bil-ijmal* and the latter *pattidari* and *bhaiyachara*. Column 2 states the area by village papers (column 5 of Table I, No. 5). Column 3 (a) shows areas covered with forests (column 2 of Table II, No. 26) which are wholly revenue-free.

† *Bharatpur*—Column 2 includes Raiyatwari area in Bharatpur Circle according to settlement papers as that by professional survey is not available for various tenures separately. See also footnotes on page 320.

(a) Represents the area by village papers (column 5 of Table I—No. 5, page 13). (b) Including cesses.

* These are *khalsas* or State lands only. The whole area of the State is stated in Table I—No. 5.

† *Jhalawar*—The whole area stated in this table is classed as “*Khatadari*” and “*Watendari*” equivalent to “*Raiyatwari*” and “*Zamindari*” respectively. Column 2 excludes entire villages held by jagirdars and udakdars.

‡ Includes population of the *Muafi* and *Jagir* villages excluded from column 2.
